SUMMARY

I'm a software engineer with top-notch problem solving ability, a fast learner and a very good team player. I'm especially experienced in back-end development.

EXPERIENCES

Mobileaction, Software Developer
December 2024 - October 2025, Full Time
I was responsible for maintaining over 30 microservices, designing and implementing new features, providing solutions to technical problems, and working in harmony with the Q & A team. Tech Stack: Spring Boot, Hibernate, Spring Data JPA, MySQL, Postgresql, RabbitMQ, AWS, Google Cloud Storage, Spring Security, Gradle, Git, Jira, Confluence.

Rollee, Software Developer
January 2022 - March 2024, Full Time
I was responsible for creating and maintaining services that retrieve information from various web applications. (Uber, Amazon, Upwork etc.) My tasks included reverse-engineering the given application authentication flow, retaining the user session over time, automating collection of every-day data, storing and analyzing them.

AppNava, Junior Software Developer
February 2021 - November 2021, Full Time
I was responsible for full-stack development of the company's website and data-engineering. As one of only two software developers, the job's scope was vague. Fortunately that taught me to get my hands dirty and overcome the technical difficulties.
